ABSTRACT

The learning methods is a systemic and organized process carried out by lecturers in delivering material to students. There are plenty learning methods that are used in a study process, one of which is Service Learning. Service Learning is a form of constructive learning method that connects between material and theory obtained in the classroom to apply it into a concrete and useful actions for the surrounding community. Creative and innovative idea is needed in commercial space interior design. This is very appropriate with the purpose of Service Learning, where the highs and lows of learning outcomes can be influenced by internal and external factors.
